## **Fixed Braces**

### **What are they?**

Braces (or bands) are orthodontic devices that consist of brackets and metal bands joined to a flexible wire that creates force to gradually align your teeth into a straighter position

- Braces require excellent oral hygiene and diet, as 'decalcification' or early stage decay can occur around the brackets
- Braces require an appointment for an adjustment every 8-12 weeks, and treatment usually takes 12-24 months
